WEATHER GUIDE.

The following Table (the result of many years' actual observation) is scribed to Dr. Herschel. It is constructed upon a due consideration of he attraction of the Sun and Moon in their several positions respecting he Earth, and serves to show what kind of weather will most probably ollow the entrance of the Moon into any of her quarters :-

toon.	Time of Change.	In Summer.	In Winter.				
Moon, or Last Quarter, happens	Between midnight & 2 A. M " 2 and 4 A. M " 4 " 6 " " 7 " 8 " " 10 " 12 " At 12 Noon, and to 2 F. M Between 2 and 4 F. M " 6 " 8 " " 6 " 8 " " 10 " midnight.	Fair. PARKS' COTTON MANUFACTURES

Awarded the ONLY MEDAL given at the Centennial Exhibition for Canadian Yaron. And the GOLD MEDAL for Cotton Goods at the Deminion Exhibition at Montreal; and First Prizes at Toronto, Hamilton and London Exhibitions of 1880 and 1881; And First Prize Medals at Toronto, Montreal, and Kingston Exhibitions of 1882, and St. John, 1882.

COTTON YARNS,

Nos. 5's to 10's.

WHITE, BLUE, ORANGE, GREEN AND RED.

Made of good American Cotton, with great care, correctly numbered, and warranted full length and weight.

We find it necessary to call the attention of those who USE COTTON YARN or WARP to the fact that the yarn made by us is the ONLY

WATER-TWIST YARN

made in the Dominion—no other mill having the machinery on which to make it. Our Yarn is, consequently, very much superior for weaving purposes to any other in the market—a fact which is well known to those who have used it for the past TWENTY YEARS.

All our Yaras have our name upon the label, and none other is genuine.

COTTON CARPET WARP,

Made of No. 9's Yarn Twisted.

WHITE, RED. GREEN, BLUE, BROWN & ORANGE,

Each 5 lb. bundle contains 9,000 yards in length, and makes a length of carpet in proportion to the number of ends in width.

BALL KNITTING COTTON,

In all Numbers and Colours, put up in 2 oz. Balls.

2 lbs. in each box, made from the finest long staple cotton, especially selected for the purpose. This cotton is very carefully spun, and will be found to be evenly made and correctly numbered. Particular care is taken to have the dying and bleaching perfectly done. FULL WEIGHT IN EVERY BALL.

COTTON HOSIERY YARN,

SUITABLE FOR MANUFACTURERS OF HOSIERY.

Better than any other made and so acknowledged by all who have used them. These goods are supplied to all the first-class Manufacturers in the Dominion.

JANUARY.—As the nautical portions of the Almanack are necessary for the Mariner, to guide him in seeking a safe track over the pathless ocean, so the Agricultural Notes given under each month are designed to form a guide to the Farmer in the daily operations which he has to perform in the course of the year, that at its cose he may reach the desired haven of a profitable balance sheet. The object of these Notes is not to give information that may be once read and thrown saide like a daily paper, but to form a daily reference book, as it were, that may be kept conveniently at hand, and constantly consulted in the course of the season is a reminder of what work has to be done day by day, and what matters and the farm, and in connection with farm business, need attention. will thus be seen that the Notes are not written for the purpose of furnishing new or original or theoretical information, but rather as reminding hints to intelligent Agriculturists already familiar with the science and practice of their profession. The notes, in fact, are to be used on the farm to assist during the progress of the season, in arranging the farm work and business. A fact known to every farmer is that no two seasons are the exact counterparts of each other, and the farmer or gardener or fruit-grower will be most successful whose groups are selected and operations carried on in view of the season proving whose crops are selected and operations carried on in view of the season proving either good. bad or indifferent. Crops that ripen well one season may not do as well on the same farm the next, and hence a judicious choice should be made. The same applies to modes of culture, and to times of preparing the ground and

sowing. These two last operations should always, however, be performed as soon as the soil and weather are fit. It is at this comparatively idle season that a plan of the year's work may be carefully prepared, and we commend this as an exercise well adapted for occupying the leisure evenings of January.

Ferruary is the trying month for cattle. We cannot too strongly impress the necessity of care in their feeding, watering and general treatment, at this season of the year. When they once begin to full off, it is uphill work to attempt to stop it. Barns may be faulty, and the cold is severely felt, and yet this is one of the least evils in Nova Scotia, for horned cattle require plenty of fresh air, and the winter and spring rates of mortality in cows in the country barns is very low compared to that of the apparently comfortable, substantial, wind-tight stables of the City of Halifax. The root cellar may be troublesome to get at, and the animals miss an occasional meal; the wells may be frozen and the way to watering

Ladies and Gents wishing their Winter Cloaks, Sacques and Overcoats renewed, will please leave them early at the SCOTCH DYE WORKS.

places may be so slippery that the cattle cannot reach them without discomfort or positive accident. In order to overcome these and many other difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened, otherwise they do not undergo the proper matiscation, but pass through the alimentary canal before a large portion of their nutritious materials has been absorbed.

MARCH.—The nature of our climate necessitates the use of a hot-bed for raising seedling plants of those crops that require a long season to mature. A hot-bed is made by piling on successive layers of well chopped horse dung obtained from a stable where oats are freely fed. The manure may be raised to a height of two or three feet above the surface of the soil. On top, spread four or five inches of very fine and rich soil mixed with sand; this should have been prepared in the Fall, and kept dry under cover all winter,—otherwise it is likely now to be in a hard

frozen mass. The glass sashes are then to be put on and kept close till the hot-bed heats; the steam and heat will start the seeds of weeds, which may be allowed to grow. Air is then given, and when the heat modifies, weed and rake the surface; and sow your spring seeds,—cauliflowers, cabbages, celery, tomatoes, &c., for the kitchen garden; and stocks, verbenas, petunias, asters, balsalms, and such-like annuals for flower garden ornament. The seeds will bear a good deal of heat before they emerge from the soil, but, as soon as the first leaves begin to appear, the framemust be aired daily, taking care to avoid cold draughts. As the young seedling plants have to be pricked out when large enough, it is a good plan to sow the vacant ground in the hot-bed (intended for this purpose) with lettuces or radishes,

or other early salads, these speedily come into use, and may be cleared away in time to transplant on the ground they occupied, the phloxes, stoks, asters, petunias, zinnias, verbenas, and other plants requiring such treatment.

APRIL.—The serious work of cultivation or raising of Field Crops begins with the advent of April. No time should now be lost in performing needful work. Manure under cover may be carted out on the frozen soil to where it is to be used. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and alsyke is the best for hay, as the white clover does not grow tall enough for cutting. When early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and whenever the ground is dry

enough, they may be planted. Peas and Broadbeans may be sown at the very beginning of the month. Onions, parsnips and carrots also should be put in as soon as the ground is fit to give them the more delicate seed-bed they require. Beets and mangold wurzel are usually sown at the end of the month or early in May. All gooseberry and current bushes should be dressed, apple and pear trees gone over, and generally the whole kitchen garden and orchard thoroughly cared for. Remove the boughs from the strawberry plants gradually, and make the flower garden neat and trim.

May.—The work of crop raising commenced in April has now to be carried on with increased vigour. The success of the farmer's year depends so much upon the month of May and the work that can be then accomplished, that every hour

should be highly valued. If any ploughing has to be done, let it be done at once; if manure has to be taken out for crops, don't wait for a more convenient season; if the weather is not all that can be desired, proceed nevertheless with your work, vary it to suit the state of the soil and the atmosphere. Men cannot fight against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? Everything except what has either already been committed to the soil, or is too tender to withstand the coldness of the soil, or the probable frosts of June. Such exceptional crops are bush-beans, pole-beans, corn, tomatoes, cucumbers, squashs; it is only in warm sandy soils that such things can be safely put out before the end of the month. Turnips also should not be sown in May. Finish all top

JUNE.—Some field crops are grown for the purpose of furnishing summer feed and winter fodder for the animals of the farm; these are used on the farm. Other crops are sent directly to the market, and are thus called "paying crops." One of the most important of these to the Nova Scotian farmer is the Potato. With us, potatoes are usually planted early in June, say from 1st to 15th. Different methods are adopted in different localities; in light land the manure is

loughed in, on heavy land it is laid in the drills. Superphosphate and kainit reatly increase the yield, which varies with the different varieties. Where the clorado bug appears, pick off by hand, or dust with Paris Green before the dew as gone off the vines. As soon as the currant and gooseberry bushes have ushed out their first leaves and early blossoms, it will be found advantageous to ive them a sprinkling of white hellebore powder in the early morning before the ew is off. This will destroy the first crop of currant worms, and thus preserve he bushes and the fruit crop for the season If this were done every year, in very garden throughout the Province, it would require only a very few years to d the Province of this pest, and then, by raising our own bushes, instead of importing, we should be no longer troubled with currant worms.

The Scarabee Powder for Destroying Cockroaches.

July.—Ploughing, sowing and planting have been completed in the months of May and June,—this month is especially devoted to the cultivation of the various field crops. Cultivation, in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows and such like implements, between or over the drills, hilling up and moulding. The object of these operations is to destroy weeds, to keep the soil open, and thus to promote the decomposition of the manure, enable the soil to retain moisture, allow free access of air, and by these means to ensure the growth of the crops. We are apt to have a good many rainy days in July, and, as most of the hoeing work has to be compressed between planting time and haying time, haying has occasionally to be begun before potato hoeing is completed; this occurs on many of the best regulated farms.

n ordinary seasons it is sure to occur on a farm where foresight is not shown, nence the miscrable root crops we so often see. Let our farming readers then be areful to forecast the weather probabilities in light of the July work to be done in the growing crops, and thus avoid the disastrous loss that comes from a negected crop. The sowing of turnips is usually recommended for the month of lune, but, as the ground has to be remarkably fine for this crop, and as turnips re often put in to fill up land that was originally intended for the earlier sown oots, it frequently happens that turnips have to be sown in July. Some even prefer to sow their Swedes this month, and the soft turnips for immediate feeding need not necessarily be sown till the end of July. The ground should have undersone a thorough pulverization. Light sandy soll is the best for Turnips. They tart best after the ground is warm, but the bulbs swell most rapidly during the

cool dewy nights in Autumn. The soil cannot be worked too deep or made too fine for Turnips. Town manures are valuable for this crop; and crushed bones have been applied with the best effects, either when covered in the drills in the manner of ordinary dung, or when sown by machine along with the seeds, so as to be in immediate contact with the latter, Guano has been largely used but not so much of late years. Superphosphate is very efficacious. One point of Turnip culture that is often neglected in Nova Scotia, although well understood elsewhere, is that the seed should be put in the moment the soil is prepared. If the earth of the prepared drills gets dried up in the sun before the seed is

eatable thing for the cattle to grow or fatten upon when the pastures are all burnt up. After having there will be work in the garden, and especially in the orchard. Look after the ripening fruit, destroy caterpillars, if any still remain; pick the early August apples, and send them into a local market, or to the picnic. When the rains come, beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in the horse pastures, house fires become troublesome, and the swallows congregate in flocks and leave us. The calving of cows for the season will now be over. All thoroughed calves should be at once registered in the official Stock Register. For grade stock the farmer should keep a record for after reference.

J. GODFREY SMITH, 147 HOLLIS STREET.

September.—Within the last two years the importation of English Horse Beans has led to the cultivation of this crop, but we regret to say that, although the climate of Nova Scotia, unlike that of the United States and Ontario, is admirably adapted for their production, yet Horse Beans still remain little more than a curiosity with us. This is a great misfortune, as there is an unlimited demand for these Beans in England, and there is no better feeding stuff on our own farms for all kinds of stock. There is no mystery and no difficulty in the cultivation of this crop, the Beans may be sown in drills or broadcast, and treated either as we would common grain or a root crop,—in fact very much like ordinary beans, or as Indian corn, with this difference, that the Horse Bean can be sown as soon as the ground is fit, for the hean is hardy, and such slight frosts as we have in the

months of May or June will not harm it. The harvesting and the threshing are the two processes that our farmers do not yet quite perfectly understand. The heavy stalks should be cut or pulled up by the roots and tied in bundles, and left on the field to dry. They will not suffer from the autumn rains; the stalks and pods naturally become black. After being apparently well ripened and dried, (having lain a week or ten days in the weather) they are removed to the barn. These bundles should remain there till the dry frosty weather of February. By that time the beans will have become hardened, and fit for threshing. If threshed before, they will likely be either mashed and injured in the process, or else the will mould and decay. The bean stalks make coarse but useful fodder. Thebeans can be mixed with oats for horses, or boiled and fed to cattle, pigs or poultry.

OCTOBER.—Now that the farming season's work is well nigh over, the young an on the farm may repair to the Normal School at Truro, where special instruction is given in the Art of Agriculture and the sciences bearing upon it, by the scturer on Agriculture. The Fruit Crop is yearly acquiring increased importance Nova Scotia, now that the markets of the world are open to our fruit growers. In fruit harvest is now being gathered; as the crop in Nova Scotia was very nort last year, (1885) especially in winter fruit, which forms the staple of our can exports, and as many young orchards are coming into bearing, it may be asonably expected, should no unusually adverse conditions arise, that the Apple top of 1886 will be probably larger than any one that has preceded it. Fruit rowing now forms one of our greatest industries; we feel therefore, in view of the uportance of promoting and extending it, that no better advice can be given

to our orchardists at this season than that which appeared in the London Garden from a prominent London firm of fruit dealers:—"New York State Apples a few years ago occupied the leading position in the trade, but have been steadily losing prestige, and goods packed in the Western and New England States and Canada have steadily gained in popularity and prices. These results have been caused by the style of packing; the New York barrel contains about 2½ bushels, has flat hoops, whilst the others hold fully three bushels and have round hoops. Baldwins in the former sell in London at 18s. per barrel, whilst in the latter they bring only 15s., 17 p. c. less, whilst the difference in quantity is only 8½ p. c. A large portion of the receipts last season were 'stuffed,' the middle of the barrel containing

nferior fruit." The advice following from all this is, use the right kind of barrel, pack it carefully with honest fruit, and Nova Scotia will acquire a reputation for pples and a potentiality of wealth far exceeding the fondest dreams of avarice.

November.—The improvement of cattle has at length taken a secure hold upon the people of Nova Scotia, and is carried out to some extent through the agency of Agricultural Societies. Every Society keeps, or ought to keep, a sufficient number of male animals for the use of members. If the selection and purchase of these be deferred till Spring time, large prices have to be paid, and suitable animals are not always obtainable. For beef cattle the Short Horn Durham breed

is the best; their growth is more rapid than that of any other kind. For milk alone, Ayrshires are to be preferred, Devons make the best working oxen, are quick, active, and easily fed, and soon fatten in the wild pastures for beef. For domestic cows in the city the creamy Alderneys or Jerseys are most suitable. The Jerseys are at present the greatest favourites, and their increase, whilst it will promote the manufacture of butter, threatens to lessen our capacity for beef production. Holsteins are also, however, becoming great favorites in a few localities, and the same may be said of Polled Angus. Herefords have not yet made their mark. There is adanger that in increasing the number of kinds in our small country, we are rather tending to convert the Province into a very interesting Zoological Garden, than to direct the Dairy and Beef Industries

into the most profitable channels. But our people are quick to learn by experience. As soon as the root crops are all cleared off the fields, and the weeds and potato vines are put in heaps to rot, the farmer should employ his whole strength of man and beast in fall ploughing. Whether on old or new land fall ploughing is a most important operation. Without a farm cannot be worked to advantage. After ploughing, do not forget to go carefully over the water furrows to make way for the exit of the floods of rain and melting snows that are sure to soak your fields before seed time. A well ploughed, well-drained field may be sown in spring as soon as the frost is gone, whilst one that is irregularly ploughed, or has no water furrows, may long remain a puddle, detying every attempt to improve its condition. The best part of what is too often left to be "Spring

DECEMBER.—Under each month are indicated the matters that most urgently require notice. Last, but not least, we call the farmer's attention to his position as the member of an Agricultural Society, in which, by example and precept, he may make his personal influence widely felt, and thereby conduce to the prosperity and advancement of by far the most important industrial interest of the Province. There are now nearly a hundred Agricultural Societies in this Province, with a membership of about six thousand farmers; each Society is entitled to draw from

the Provincial Treasury an annual grant in aid to promote its operations. The special purpose of a Society is to improve the live stock of its district, which is accomplished by obtaining and keeping for the use of members, superior male animals, such as bulls, rams and boars. Societies may also introduce seeds of new varieties of grain, roets, and also improved implements, and sell them to members at cost and charges. Exhibitions are held by the Societies of a District, embracing two or more Counties, combining. The whole of the Societies of the Province meet on the first Tuesday in December, each in its respective District, when the members receive the Director's Report, and select officers for the ensuing year. Full information as to the method of organizing Societies may be obtained on application at the Office for Agriculture, Province Building, Halifax.

PUTTNER'S EMULSION is

YOUNG WOMANS' CHRISTIAN ASSOCIATION—President, Mrs J. Farquharson. Treasurer, Mrs C. C. Blackadar. Secretary, Miss F. Pryor. This Society aims at promoting the welfare of young women in the City, by means of a night school, libraries, &c., &c.

SABBATH SCHOOL ASSOCIATION.—This Society is intended to bring together once a year representatives of all the Sabbath Schools throughout the Maritime Provinces, in order to discuss the most approved methods of prosecuting their work. Secretary, James Forrest, Halifax, N. S.

HALIFAX INFANTS' HOME—The object of this Home is to receive and care for destitute infants. Its affairs are managed by a Committee of ladies. The annual expenditure amounts to about \$3000. The number of infants in the Home at any one time is about forty-two. When the children are about two years old they are given out to be adopted by families in the country. Over one hundred have been thus provided for within the past eight years. Miss Nordbeck, Treas., Studiey. Mrs E. M. Saunders, Sec'y., Cariton Street.

Deaf and Dumb Institution—(Gottingen Street.) This Institution has been in operation for twenty-one years. It is supported partly by grants from the Governments of the Maritime Provinces, and partly by voluntary contributions—most of the pupils being too poor to pay for their board and education. The pupils range in age from five years up to twenty-five. Those who have the full benefit of an education here are able to express themselves with fluency. Patron, His Honor the Lieut.-Governor of Nova Scotia. Chairman, Hon D. McN Parker, M.D. Treas, A. K. Mackinlay. Com. G. R. Anderson, R. W. Fraser, G. H. Starr. See'y, Principal Forrest. Principal, J. Scott Hutton, M.A. Matron, Mrs Vinecove. Physicians, Hon D. McN. Parker, M.D., Dr. Campbell. Dentist, Dr Alfred Cogswell.

Home for the Aged—This place is intended to afford a comfortable retreat to respectable women of advanced years whose means of livelihood are very limited. Eighty dollars a year paid by the inmate or by a friend secures all the comforts of a home. The Institution owes its existence to the thoughtful liberality of the late William Murdock, Esq. President, Mrs W. S. Stirling. Secretary, Miss Forrest. Treas, Miss A. Nordbeck.

PROTESTANT ORPHANS' HOME—Protestant orphans, two years old, and upwards, are admitted to this Institution. It enjoys considerable endowmen's. Comfortable homes in the country are sought out and secured for boys and girls as they grow up. Secretary, Mrs R. Pickford. Treasurer, Mrs J. H. Liddell.

PROTESTANT INDUSTRIAL SCHOOL.—Intended to teach and train for some useful occupation boys who might otherwise be left to grow up as "roughs" and criminals. It is under the management of a committee of gentlemen and ladies. Secretary, E. D. Meynell Surgeon, Dr. Slayter. Superintendent, Mr Norman.

HALIFAX VISITING DISPENSARY.—Medical aid is afforded by this Institution to hundreds of poor patients. Those who need such attention are visited by Physicians at their homes. Those who can come to the Dispensary at the proper hour are duly attended to there. President, W. C. Silver. Treas, J. F. Kenny. See'y, W. H. Wiswell.

DIRECTIONS TO MARINERS WITH REFERENCE TO CANADIAN STORM WARNINGS, ISSUED FOR QUEBEC AND THE MARITIME PROVINCES.

Explanation of Signals made off on the Storm Signal Staff at the Citadel.

I.—Cone, hoisted with the apex downwards, indicates "moderate gale is expected," probably at first from an easterly direction.

II .- Cone, with apex pointing upwards, indicates "moderate gale is

expected," probably at first from a westerly direction.

III .- Drum, with Cone underneath, the apex pointing downwards, indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV .- Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direc-

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed

40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong

winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is

expected to exceed 40 miles an hour. The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

The night signal, corresponding to Nos. 2 and 4, is two white lanterns

hanging horizontally.

1886]

Notes.—Mariners will be able to obtain further information from Drum Agents, or by consulting the daily probabilities. Mariners must always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such

a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the

Central Office, Toronto, Ont.

TEMPERANCE DIRECTORY.

Sons of Temperance.—The first Division was organized at Yarmouth, Nov. 17, 1847. The Grand Division was organized April 22, 1848. There are now three hundred and seventeen Subordinate Divisions (317) with eighteen thousand four hundred (18,400) members,—45 Bands of Hope with 4000 members; and six Sections of Cadets with 260 members; Grand Worthy Patriarch, Rev. John Murray, Sydney; Grand Scribe, Rev R. A. Temple, Halifax. Agents and Lecturers of Grand Division, Thomas Hutchings and Thos. M. Lewis. Quarterly sessions of G. D. are held in different parts of the Province, in January, April and July. The annual session is held each Autumn in Halifax. There has been an increase of thirty (30) active divisions during 1885, and one thousand four hundred (1400) members.

UNITED TEMPERANCE ORDER (formerly British Templars).—Grand Lodge of Nova Scotia organized in 1863. Has now about 20 Lodges containing about 1000 members. *President*, John H. Taylor, Gays River Road, Halifax Co. We understand this Order has amalgamated with the "Royal Templars."

I. O. C. GOOD TEMPLARS OF THE WORLD.—The first Lodge organized at Economy, Colchester County, July 4, 1864. Grand Lodge of Nova Scotia formed February 5th, 1867; there are now 85 Subordinate Lodges with 3700 members; 9 Juvenile Temples with 250 members; G. W. C. T., B. D. Rogers, Stellarton; G. W. S., J. M. Baillie, Stellarton. The next Annual Meeting will be held at a place and time (summer of 1886) to be named by the Executive, due notice of which will be given in the newspapers.

I. O. OF GOOD TEMPLARS, LOYAL.—Grand Lodge of Nova Scotia re-organized Nov. 21, 1876, 95 Subordinate Lodges, and about 4500 members; 10 Juvenile Temples with 500 members; G. W. C. T., Rev. J. B. Woodland, Yarmouth; G. W. S., P. J. Chisholm, Truro; Genl. Sup. of Juvenile Templars, S. Archibald, Watervale, Pictou County. Next Annual Session will be held the first Tuesday of July, 1886.

THE BLUE RIBBON CLUBS within the past ten years have been organized in nearly every County of the Province. The aggregate membership in the Autumn of 1878 was estimated at 20,000. The members of active Clubs has largely decreased, but there are members yet scattered throughout the Counties. At this date (Autumn of 1885) the enrolled membership of the various Temperance organizations in Nova Scotia is as follows:—

LOYELL'S LIBRARY

AHEAD OF ALL COMPETITORS.

The Improvements being constantly made in "Lovell's Library" have placed it in the Front Rank of Cheap Publications. The publishers propose to still further improve the series by having

Better Paper, Better Printing, Larger Type,

and more attractive cover than any series in the market.

SEE WHAT IS SAID OF IT:

The following extract from a letter recently received shows the appreciation in which the Library is held by those who most constantly read it :-

"Mercantile Library, Baltimore, Aug. 29, 1883.

"Will you kindly send me two copies of your latest list? I am glad to see that you now issue a volume every day. Your Library we find greatly preferable to the 'Seaside' and 'Franklin Square' Series, and even better than the 12mo. form of the latter, the page being of better shape, the lines better leaded, and the words better spaced. Altogether your series is much more in favor with our subscribers than either of its rivals.

S. C. DONALDSON, Assistant Librarian."

GENERAL MINING ASSOCIATION.

(LIMITED.)

The Coal from the Mines of this Association, which are situated at North Sydney, Cape Breton, is the Coal which has become so well known as Sydney Coal.

It is the only Coal entitled to be so called, the trade mark, "Sydney Coal," having been registered, owing to the numerous attempts to sell other Coals from Cape Breton as "Sydney," taking advantage of the reputation gained under this name by the above Coal.

Sydney Coal has long stood alone in its reputation for House use. It is also an excellent Steam Coal.
